

Casing Pipe Information:

Inside diameter:	Wall thickness:
Pipe material	Material specification:
Length of casing:	Number of vents

Construction Information:

Method of installation (choose one): <input type="radio"/> Dry Boring <input type="radio"/> Jacking <input type="radio"/> Trenching (for longitudinal installation only) <input type="radio"/> Other _____
Distance from header of dry boring or jacking pit to center of closest track measured perpendicular to track:
Vertical distance from base of rail of lowest track to top of casing:
Distance from bottom of track ditch to top of pipe:
Distance below ground surface outside of track and track ditch area:

Submit two (2) copies of this application along with plan view and cross sectional view sketches showing the proposed pipeline and the railroad track for total occupancy of railroad property. Show actual designed depths heights, and distances, not minimum standards.

If in the opinion of Railroad, sufficient hazard is involved, Railroad will supply a flagman, with proper advance notice, or if the pipeline installation requires removal, replacement, modification, or locating of track, bridges, signals, railroad wires or pipelines, roads, or the supply of railroad engineering or supervision, the applicant agrees the full cost of such railroad services will be borne by the agreement holder.

Failure to provide all of the requested information will result in the automatic cancellation of this application.
